

## WARFARIN MANAGEMENT FLOWSHEET

Liberty Anticoagulation Clinic – 4200 Frankford Ave, Philadelphia PA

**Patient: Okafor, Margaret DOB 03/22/1952**

INDICATION: Mechanical mitral valve replacement (St. Jude bileaflet, 09/2015). TARGET INR RANGE: 2.5 - 3.5. Duration: LIFELONG.

NOTE: Mechanical MITRAL prosthesis - do NOT hold or reverse warfarin without cardiology involvement; if interruption required, bridging with heparin per cardiology.

CURRENT REGIMEN: Warfarin 5 mg PO daily; 2.5 mg on Sundays (32.5 mg/week).

### INR HISTORY:

|            |         |              |                                                                     |
|------------|---------|--------------|---------------------------------------------------------------------|
| 07/10/2026 | INR 2.7 | In range     | No dose change                                                      |
| 06/19/2026 | INR 3.1 | In range     | No dose change                                                      |
| 05/29/2026 | INR 2.4 | Slightly low | Sunday dose 2.5 -> full 5 mg for 1 week, then resume; recheck 3 wks |
| 04/16/2026 | INR 2.9 | In range     | Hospital discharge check                                            |
| 04/12/2026 | INR 2.6 | In range     | On admission                                                        |
| 03/06/2026 | INR 2.8 | In range     | No dose change                                                      |

INTERACTIONS FLAGGED: Antibiotics frequently potentiate warfarin (esp. TMP-SMX - also ALLERGY/SJS, fluoroquinolones, metronidazole). Recheck INR within 3-5 days of starting any antibiotic.

Next scheduled INR: 08/07/2026.

Managing pharmacist: R. Delgado, PharmD, CACP
